PROFESSIONAL SUMMARY

Product, brand and marketing lead with 12+ years taking products from idea to market. Built and launched four products in 2026, writing the specification, choosing the stack and directing coding agents such as Claude Code: InSpiritInTruth, a devotional app with 131 monthly active users, its first paying subscribers and a 5.0 App Store rating; tapa., a recipe app; CaughtSlipping, a Chrome extension with 183 installs; and Hakkan, an AI research tool. Led Social Sweep at Innovatr from the build-versus-buy case to launch and upkeep, replacing a US$5,000-a-year licence; it now sells in every Innovatr membership. Earlier ran e-commerce end to end at Reka Afrika and iBags: suppliers, product range, presentation and the online store. Brings the go-to-market depth product teams usually hire in: positioning, paid acquisition at roughly three times better cost per lead than the B2B median, and CRM and marketing automation.
